Claims:

1. A method for analyzing a corporate disclosure,

   comprising

   providing a record of a disclosure made by a representative,

   identifying a stimulus given to the representative,

   reviewing for a pre-determined period of time behavior of the representative

   responsive to the stimulus to determine the presence of a cluster of deceptive

   behaviors, and

   noting an identified cluster within a record of the disclosure.

2. A method according to Claim 1, wherein identifying a stimulus includes

   identifying a question posed to the representative.

3. A method according to Claim 1, wherein reviewing behavior includes

   reviewing behavior for a predetermined verbal or non-verbal response.

4. A method according to Claim 1, further comprising

   subdividing the disclosure into sections.

5. A method according to Claim 4, wherein subdividing into sections includes

   topics, time periods, representatives, and interviewers.

6.　　A system for analyzing a corporate disclosure, comprising

a recorder for generating a record of a disclosure by a corporate representative,

a display for presenting the record for analysis by a reviewer, and

annotation means for allowing the reviewer to annotate the record to indicate the presence of a cluster of deceptive behavior delivered in response to a stimulus and within a predetermined time period.
